

Security Baseline

Organization

1. Roles

- Information security manager: This is in the hands of the Scientific Director(s). Currently Huub Rottgering and Eric Eliel.
- Security Manager: This role is associated to the IT Department head. Currently Erik Deul
- Security Officer: This role is delegated to one of IT Department employees. Currently Leonardo Lenoci.

2. Limited actions in handling cycle

Due to the limited size of the IT Department group it is inevitable that one person does handle the complete cycle for a critical information system. It is well known to all members of the IT group that this is the case and should be treated with utmost caution.
